If the selected video is associated with an evaluation (such as an Ad Hoc evaluation for a Case), an educator / administrator can view the video and complete the evaluation.

An Evaluator can also be assigned to assess the SP's performance. The SP Performance associated with the Case will be the evaluation checklist the assigned evaluator will receive.

Click the SP Assessment button to evaluate the performance of the SP in a case.

Note: Video is required to complete an SP Performance Assessment.

Unpin Video

The screenshot shows the SIMULATIONiO interface. At the top, there is a navigation bar with tabs for 'Items Library', 'Cases & Scenarios', 'Sessions & Courses', 'Video', 'Evaluations', 'Scores & Reports', and 'Settings'. The 'Video' tab is active. Below the navigation bar, the breadcrumb path is 'Home / Video / 10/2/2017 1:59:41 PM'. The main content area is split into two panes. The left pane shows a video player with a 'TVI_Cam1A' tab and a video feed of two medical professionals in a simulation room. A push pin icon is overlaid on the video. The right pane is a settings panel with tabs for 'General Information', 'Bookmark', 'Access', and 'Video Feeds'. The 'General Information' tab is selected, showing fields for 'Start Time' (10/2/2017 1:59:41 PM), 'Room' (ROOM 04-TVI DVR), and 'Session' (<Non Indexed>). There is also a 'Notes' text area and 'Lock' and 'Save Changes' buttons.

The video pane can be “unpinned” from its stationary position by clicking on the push pin icon  on the upper right of the video window. This is convenient when completing a long assessment so that the video can move as the evaluator moves through the checklist for constant viewing.
