

Case Collections

Cases can be grouped together into a **Case Collection**. This is a way to help you organize the cases you will use and filter out the cases you will not need for scheduling a session. There can be any number of cases in a collection, and the case can be a member of multiple collections.

The screenshot shows the SIMULATIONiQ Enterprise interface. The top navigation bar includes 'Items Library', 'Cases & Scenarios', 'Sessions & Courses', 'Video', 'Evaluations', 'Scores & Reports', and 'Settings'. The 'Cases & Scenarios' menu is expanded on the left, showing options like 'Cases', 'Checklists', 'EHR (Electronic Health Records)', 'Case Collections', 'Case Authoring', 'Case Trainer', and 'Didactic'. The main content area displays a grid of feature cards, each with an icon, a title, a description, and a 'New +' button. The 'Case Collections' card is highlighted with a yellow border. The cards include: SP Cases, Scenarios, Case Collections, Checklists, EHR (Electronic Health Records), Competencies, Case Authoring, and Case Trainer.

1. Click **Cases & Scenarios > Case Collections > Add New.**

Case Collection ×

To define a set of cases, type a unique name for this collection, and then click Add Case to search for cases to add to the collection. Type the minimum overall score needed to pass the session and the minimum number of cases required to pass the session. Click Create to save this collection of cases.

- Click **Add Case** to search for cases and add to the collection.

Cases ×

To search for cases to add to a collection, type the keyword, and then click the drop-down arrow to select the search criteria to narrow your search. The search result appears in the grid based on the keyword entered. Click the checkbox next to the case to select it, and then type the weight and the minimum required needed to pass the case. Click the checkbox if this case is required to pass. Click Add to add the selected cases to the collection.

Save Changes

3. Click the checkboxes to select the cases to add to the collection.
4. Type the **Weight and the Minimum % required** to pass the case:

Weight	<p>Enter case weight. A case needs to be weighted for it to be counted in the scoring process. The default value is 1.0. The Weight of the case is used to calculate the weighted mean average score for the session for each student. This information is mandatory. <i>Enter up to 2 decimal places for Weight (i.e., 1.00).</i></p> <p>The system will adjust score according to weight given. A weight of zero means the data can be collected but it won't count in the scoring process.</p>
Minimum Required %	<p>The minimum overall score percentage that is needed for a student to pass the Case. A zero in this box denotes that there is no minimum pass requirement for the case.</p>
Must Pass	<p>Click the checkbox if this case is required to pass.</p>

5. Click **Save Changes**.
