To generate scores, click the **Generate Score** button in the upper right corner of the **Score** reports screens activity page.

Report Data is based on the last date and time the system generated scores, which is indicated in the Report Data section. The date and time of the next scheduled calculation process (per the system parameters) is also indicated. To generate pending scores:

1. Click **Generate Score**. A message appears: "This may take a few minutes. Do you want to continue?"
2. Click **OK** to continue.
