<p>A dedicated streaming server can be used for optimal performance of the Enterprise application as a high-performance streaming media to computers and mobile devices.</p>				

### Live Streaming

Enhanced live streaming capabilities to allow users to view live streams across all supported browsers and devices.

**Contact your EMS Customer Success Manager for more information.**

### Competency.AI Integration

Integrated SIMULATIONiQ Enterprise with Competency.AI.

- Set the Competency.AI parameters in SIMULATIONiQ Enterprise.
- Import competencies from Competency.AI into SIMULATIONiQ Enterprise > Items Library.
- Upload assessment data from Competency.AI to SIMULATIONiQ Enterprise > Sessions & Courses Toolbelt.

**Contact your EMS Customer Success Manager for more information.**

See **Competency.AI & SIMULATIONiQ Enterprise Integration** on the EMS Support Center for more information.

### Dashboard

- Added Refresh button to the Dashboard to refresh the list manually as needed. **Note:** Dashboard refreshes every 30 seconds automatically.
- Removed videos from My Items for Administrators.
- Added a Search option to the Dashboard To-Do List Other tab
- Resolved issue with Dashboard reload when scrolling on an iPad.

### Cases & Scenarios

Resolved an error which was caused when role based checklists were deleted from a scenario.

## Sessions & Courses

- Added search functionality for Instructors and removed search functionality within drop-down list.
- Fixed ability to add participants to recurring sessions in Advanced view.
- Resolved room validation error message when adding sessions from the Recurring session list.
- Displayed the post encounter questionnaire correctly for all cases in a case collection.
- Sorted Department filters by full display name. (*University of Florida - Gainesville*)

## Video

- Removed mandatory learner validation when indexing video.
- Added video editing capability for immediate playback on 24 x 7 recordings.

## Evaluations

- Fixed ability to delete pending Learner Encounter Notes when searching by a specific date range.
- Saved all Evaluation data more efficiently to improve performance.
- Displayed all learners in the learner drop-down list when adding a new ad hoc evaluation using the ad hoc session option. Also added keyword, learner group, and graduation year search options.
- Fixed issue where response choices were duplicated.

## Scores & Reports

- Displayed the session dates in schedule date order and the case/scenario name in alphabetical order on the Performance Statistics > Class Summary.
- Updated the Evaluation Response report description: Displays the evaluator response with both question level and case level (general) comments. Scores displayed are the average score of all prime evaluators.
- Sorted Department/Organization Unit filters by full display name. (*University of Florida - Gainesville*)

## Settings

- Displayed edit activities in the Case/Scenario Audit Log only if a change is made.
- Displayed user profile edits in the User List on the User Management Audit Log.
- Maintained Role Name in Task Access Audit Log when any change is made.
- Removed 5000 user restriction and improved performance in Settings > User List.
- Added newly created sessions to the Session Audit Log.
- Added a parameter to the General tab: "Disable user's ability to edit Learner ID and Access Card ID. Default is No." Users will not be able to edit the Learner ID and Access Card ID fields on their Profile.  
**Note:** Users who have access to Settings > User List can still edit these fields even if the parameter is set. The system validates that the Learner ID on the user profile is unique.
- Fixed ability to change the status of a Zone to Retired.
- Resolved Bulk User Import failure if primary email address is missing. Primary email address will only be required if Single Sign-on (SSO) is enabled.

## AV

- Added validation when changing the session date/time for a recording schedule that is in progress or completed: "Recording/Paging schedule is currently running or is in a Completed status. Please delete the recording/paging schedule in order to change the session date/time."
- Displayed DVD recording options only if the "Allow creating automated camera DVD schedule" is enabled.
- Displayed the Message Player only if Paging is selected.
- Closed delete video confirmation screen without deleting the video when clicking the X.
- Loaded the Session screen if the Message Player drop-down list is empty.
